Office Action Summary	Application No. 09/477,057	Applicant(s) KLAUS, ROBERT	
	Examiner Robert W. Morgan	Art Unit 3626	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Response to Amendment

1. In the amendment filed 2/16/05, the following has occurred: Claims 1, 4, 5, 7, 8, 11, 14, 16, 19, 21, 22 and 26 have been amended. Now claims 1-29 are presented for examination.

Specification

2. The amendment filed 2/16/05 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows:

The newly added recitation of “controlling access to the server by the risk carrier and maintaining data stored within that database including storing data records relating to each of the identified risk cedents and providing to the identified risk cedents secure access to selected data records” within claims 1, 5, 8, 11, 16, 21, 22 and 26 appears to constitute new matter. In particular, Applicant does not point to, nor was the Examiner able to find, any support for a “controlling access to the server by the risk carrier” within the specification as originally filed. As such, Applicant is respectfully requested to clarify the above issues and to specifically point out support for the newly added limitations in the originally filed specification and claims.

Applicant is required to cancel the new matter in the reply to this Office action.

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 3626

4. The specification is objected to under 35 U.S.C. § 112, first paragraph, because the specification, as originally filed, does not provide support for the invention as is now claimed for the reasons given in section 2 above.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-29 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The steps of “controlling access to the server by the risk carrier” is critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). During an interview on 3/4/05, Applicant discussed adding structural components to the claims in order to distinguish the risk carrier’s control of accessing a server where there is the posting proposals and entering and acceptance of offers that is an essential step in carrying out Applicant claimed invention.

It is noted that on page 17, lines 1-10 and page 21, lines 3-10 of specification, describes in general, the use of password or used ID, in accessing a server. However, it is unclear how the control of the access to server is limited only to the risk carrier. As such, it would require undue experimentation on the part of one having skill in the art at the time of the invention to make and use the claim^{ed} invention.

Independent claims 1, 5, 8, 11, 16, 21, 22 and 26 appears to recite limitations that are not enable^d by originally filed specification.

Art Unit: 3626

Response to Arguments

Applicant's arguments with respect to claims 1-29 have been considered but are moot in view of the new ground(s) of rejection.
